

9th ANNUAL CONFERENCE

PAKISTAN SOCIETY OF NUCLEAR MEDICINE

25TH - 27TH OCTOBER, 2024

SERENA HOTEL FAISALABAD

PRESIDENT'S MESSAGE

Dear Colleagues & Distinguished Guests,

It is my great pleasure to welcome you to the 9th Annual Conference of the Pakistan Society of Nuclear Medicine (PSNM), to be held from October 25-27, 2024, at Serena Hotel Faisalabad. This year's theme, "Nuclear Medicine: Expand the Boundaries," reflects our ongoing commitment to advancing the field and pushing the limits of what is possible through cutting-edge research, clinical applications, and innovations.

Our scientific committee has worked diligently to put together a comprehensive program featuring a diverse array of presentations, workshops, and interactive sessions. We will cover a wide range of topics, from Hybrid Imaging, General Nuclear Medicine, Nuclear Cardiology and theranostics, to emerging technologies and the role of molecular imaging. The program is designed to foster collaboration and learning across multiple specialties, aiming to provide insights that will shape the future of nuclear medicine in Pakistan.

The conference also offers an excellent opportunity for networking and exchange of knowledge with fellow professionals, both nationally and internationally. In addition to the scientific discussions, I encourage you to take part in our special pre-conference workshops, including the "Read with the Experts" case-based learning and a thought-provoking debate between nuclear physicians.

I would like to extend my heartfelt gratitude to the organizing committee, sponsors, and collaborators for their efforts in making this event possible. I also want to thank all the participants who continue to make this conference a success, year after year.

I look forward to seeing you in Faisalabad for an enriching and inspiring experience.
